

# Semiconductor Wafer Training Course

The building blocks of innovation

Inseto's wafer training course will help attendees improve their understanding of the different material types and grades, manufacturing and processing methods, control parameters and specifications.

This knowledge will assist with wafer handling, plus selection and material suitability for specific applications.

The topics and the duration of the course can be adapted to suit the specific user requirements.

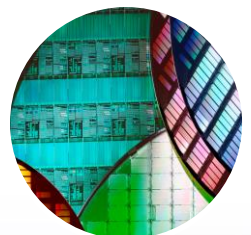

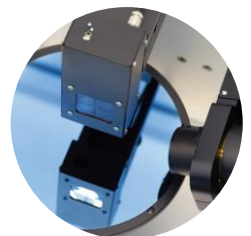

## Example Outline Agenda:

- Wafer types
- Growth methods
- Process Steps
- Important parameters
- Metrology
- Quality and traceability

Inseto's Semiconductor wafer training courses can be held online, or onsite as required. A range of associated training courses covering Lithography, Wafer Probing and Wire Bonding etc., are also available.

## About Inseto:

Inseto has a long history of supplying high-quality wafers for semiconductor and related applications used worldwide by universities, research facilities, original equipment manufacturers and wafer fabrication sites.
